## SUMMARY

As a software engineer with a background in history, I am passionate about innovations that influence the future and I am seeking to apply these ideas. Driven by the rewards of developing and solving problems, I have built multiple applications while learning how to code over the last year.

## SKILLS

React  
Javascript  
HTML  
CSS  
Sass  
SQL  
Express  
Ruby on Rails  
jQuery  
AJAX  
Node.js  
MongoDB  
PostgreSQL  
Bootstrap  
AWS S3  
Git  
Heroku

## CERTIFICATION

### Udemy

Advanced CSS and Sass:  
Flexbox, Grid, Animations and  
More!  
March 2020

### Codecademy

Build Front-End Web Apps  
from Scratch  
May 2019

## EDUCATION

**University of Houston**  
**Clear-Lake**, Houston, TX  
*History BA* —  
*Literature Minor*  
May 2017

## PERSONAL PROJECTS

### HajimeDdit — *Social Media Site*

- Implemented high-fidelity Sketch mockup
- Built Front End with React.js and Sass
- Utilized Express server with MongoDB for database table
- Improved user experience by persisting authentication utilizing js-cookie

## EXPERIENCE

### General Assembly, Boston, MA — *Software Engineer Immersive Fellow*

September 2019 - present

Completed 4 full-stack applications during a 500+ hour, 12 week immersive program.

- Chess Game
  - Built Front End with React.js and Bootstrap
  - Utilized Express server with MongoDB for database table
